POLYMER PHYSICS
A Selection of Papers from the Fifth International Seminar on Polymer Physics, 21–25 April 1987, High Tatras, Czechoslovakia

| AUTHORS | | ARTICLES |
|---|---|---|
| **J S Colligon** | 1 | Introduction |
| **H Pagnia** | 3 | Carbonaceous thin films |
| **J Sworakowski and S Nešpůrek** | 7 | The spectroscopy of traps in single crystals, polymers and deposited thin films by space–charge-limited currents |
| **J Tyczkowski and P Kazimierski** | 11 | Low temperature conductivity in plasma-polymerized silazane films |
| **H Biederman, I Chudáček, D Slavínská, L Martinů, J David and S Nešpůrek** | 13 | Physical properties of metal/a–C : H composite films |
| **Z Novotný and H Biederman** | 17 | Some properties of plasma-polymerized hexamethyldisilazane |
| **A Fejfar, L Martinů and I Oštádal** | 19 | Microstructure and optical properties of gold-doped plasma polymerized halocarbons |
| **J Klimovič, O Ulmann and L Martinů** | 23 | Low-temperature luminescence of plasma-polymerized poly(*N*-vinylcarbazole) films |
| **H Biederman, H Lehmberg and H Pagnia** | 27 | On the source of current-carrying filament material in MIM-diodes |
| ABSTRACTS | | |
| **M Marvan** | 29 | Physical limitations of molecular electronic devices |
| **R P Howson, A G Spencer, K Suzuki, R Lewin and I Sutherland** | 29 | The modification of polymer surfaces by the deposition of thin films |
| **H Biederman and R P Howson** | 29 | Polymer and carbon films deposited by dc planar magnetron |
| AUTHOR INDEX | 31 | |
| REGULAR FEATURES | | |
| **L Bárdoš and M Libra** | 33 | Effect of the oxygen absorption on properties of ITO layers |
| **G Carter, I V Katardjiev and M J Nobes** | 37 | An improved altered layer model for ion assisted deposition under net sputtering erosion conditions |
| **S Lugomer, M Kerenović and M Stipančić** | 45 | Morphologic bifurcation observed in the nonisothermal oxidation of molybdenum |
| **R K Nahar, N M Devashrayee, W S Khokle and P J George** | 51 | Contact resistance characteristics with AlSi alloy metallization |
| **A Rusek and K Zdunek** | 55 | State of impulse plasma in the coaxial generator with continuous gas flow examined by indirect observations |
| NEW PATENTS | 63 | |
| SOFTWARE SURVEY SECTION | I | |

ION BEAM INTERACTIONS WITH MATTER
Proceedings of the International Symposium on Applications of Ion Beams Produced by Small Accelerators, 20–24 October 1987, Jinan, China

| AUTHORS | | ARTICLES |
|---|---|---|
| **Zhong-lie Wang, Ke-ming Wang, R Wong and Fujia Yang** | **71** | Preface |
| **J A Davies, B J Robinson, J L E Stevens, D A Thompson, Jie Zhao, T E Jackman, R L S Devine and W T Moore** | **73** | Channeling studies in strained-layer epitaxial structures |
| **H Leier, F Burgäzy, A Forchel, K Streubel, F Scholz and M Pilkuhn** | **79** | Analysis of InGaAs/InP multi-quantum-well structures by ion backscattering |
| **Liu Jiarui and Zhang Qichu** | **83** | Proton channeling effect of $\alpha$-$LiIO_3$ single crystal |
| **M L Swanson** | **87** | Lattice location of solute atoms by channeling |
| **Xianzhou Zeng, Xiankang Wu, Qiyun Shao, Huiying Yao, Yinlan Zhong and Dechang Wei** | **91** | An improved on-demand beam pulsing system and its application to art and archaeology |
| **K Ishii, H Hamanaka, S Morita, M Ohura, Y Yamamoto and Y Awaya** | **97** | High-resolution PIXE with crystal spectrometer and position-sensitive proportional counter |
| **R D Edge** | **101** | Ion beam profiling of small objects using resonant nuclear reactions |
| **Hu Xuanwen, Xu Yongchang, Zhang Shishen, Liu Fengying, Zhao Chongde, Tang Chao and Chang Jiacen** | **107** | Nitrogen profiling in implanted iron sample by $^{14}N(d,\alpha_1)^{12}C$ reaction |
| **Ji Chengzhou, P Wang and W L Roth** | **111** | The observation of water penetration into Na–beta-alumina by $^{1}H(^{15}N,\alpha\gamma)^{12}C$ reaction |
| **Jiang Wei-lin** | **115** | Nuclear reaction analysis of oxygen by means of a small magnetic spectrometer and a new deconvolution method |
| **Liao Changgeng, Wang Yongqiang, Xiang Jinzhong, Ma Zhihui and Zheng Zhihao** | **119** | Concentration profiling of nitrogen in steel and amorphous silicon by $^{15}N(p,\alpha\gamma)^{12}C$ nuclear reaction analysis |
| **Liu Jiarui, Zhu Peiran, Feng Aiguo and Li Dawan** | **121** | The elastic recoil detection by C ions for hydrogen profiling in solids |
| **Lu Xiting, Xie Yuan, Liu Jiarui and Zheng Zongshuang** | **123** | Depth profile of $^{18}O$ at the titanium surfaces using the nuclear reaction $^{18}O(p,\alpha)^{15}N$ |
| **E Perillo, G Spadaccini, M Vigilante, M Savastano, A M Mancini, A Quirini, L Vasanelli and R Giorgi** | **125** | Rutherford backscattering spectrometry of real CdTe surfaces |
| **C Rau, C Jin and C Liu** | **129** | Magnetic order at Tb surfaces determined by electron capture spectroscopy (ECS) |
| **B J Robinson, D A Thompson, Y Yang, B K Garside, J A Davies and P E Jessop** | **133** | Channeling studies of $Pb_{1-x}Sn_xTe/PbSe_yTe_{1-y}$ epitaxial structures |
| **Guang-hou Wang, Lie Dou, Zhi-gou Liu, Yi-zhang Zhu, Tao-nan Zhao, Yan-hou Jiang and Ji-hong Yang** | **137** | SIMS characterization of hetero-isotopic cluster ions of lithium fluoride |
| **Zhang Dazhong, Wang Nengming, Chen Suqing, Chen Jianxuan, Hu Changhing, Luo Zhuming and She Limin** | **139** | PIXE analysis of trace elements in hair and their correlation with acute cerebrovascular diseases |

| | | |
|---|---|---|
| **Ji-Zhong Zhang, S Y Lin, Wei-Kan Chu, R P Kusy and J Q Whitley** | 143 | The diffusion of metal in polymer films |
| **Zhang Shuzhi, Wei Ai-jian, Tan Chun-yu, Xia Yue-yuan, Lei Zhen-huan, Zhang Zhaolin, Wang Yihua, Chen Lu, Liu Jia-rui, Zheng Zong-shuang and Zhu Pei-ran** | 147 | Characterization of radiation damage by ellipsometry and channeling |
| **Zhu Peiran, Liu Jiarui, Zhang Jinping and Yin Shiduan** | 151 | MeV He microbeam analysis of a semiconductor integrated circuit |
| **Zhou Wei, Yang Genqing, Yu Ning, Zhou Zuyao and Zou Shihchang** | 153 | RBS studies of As redistribution during silicide formation by RTA |
| **Lu Zhiheng** | 159 | A study on phase transformation of As heavily implanted Si during post-processing following rapid thermal annealing |
| **A Grouillet** | 163 | High energy ion implantation into silicon—an application in CMOS technology |
| **Bai-Xin Liu** | 169 | Some new structural transformations induced by ion beams |
| **F W Saris** | 173 | Materials modification by MeV ion implantation |
| **Fulin Xiong, C W Nieh, T A Tombrello, D N Jamieson and T Vreeland Jr** | 177 | Characterization of high-energy heavy-ion implanted InP crystals by a variety of techniques |
| **Cheng Shichang, Zhang Hui and Fu Dejun** | 183 | Boron implantation of diamond-like carbon films |
| **Lu Haolin, Su Huiqin, Mei Chen, Yang Qifa, Xu Qiu, Xiang Deguang and Zhou Tianyou** | 187 | Effects of B, N, Cr and Mo ion implantation on the corrosion resistance of pure iron and its alloys (GCr15 and Cr4Mo4V) |
| **Yang Xihong, Mao Sining, Chen Jian, Liu Jiarui, Yang Feng, Gao Wenyu and Wang Yu** | 191 | Investigation of ion beam induced phase transformation in Ni/Si, Nb/Si, Mo/Si and Ti/Si systems |
| **Gao Lu-quan, Zhu Jin-liang, Cai Ren-keng and Jiang Xin-yuan** | 195 | Argon–boron double implantation in silicon |
| **A Hallén, P Håkansson and B U R Sundqvist** | 199 | Fast ion induced defects in silicon and semiconductor applications |
| **Dowson Lee, Zhou Shuxing and Yan Shulan** | 203 | Si ion implantation into LEC semi-insulating GaAs |
| **Li Guohui, Ma Yi, Zhang Tonghe and Luo Yan** | 205 | Interaction effects between arsenic and boron ions implanted in silicon during furnace annealing and RTA |
| **Li Jin-hua and Pan Yi-ming** | 209 | Purification of $P^{2+}$ beam and anti-punch-through implantation of P-channel MOSFET |
| **Duan Li, Li Weizhong, Wang Yong and Lin Yufeng** | 211 | A new SILO process for VLSI isolation using $N_2^+$ ion implantation |
| **Lin Zhenjin, Wu Liu, Yang Xizhen, Liu Yuliang, Wang Shirun, Liu Xitian and Li Guiying** | 215 | Formation of $GaP_{1-x}N_x$ alloys by double ion implantation |
| **Liu Jialu, Zhang Tingqing and Yang Xiaoyue** | 217 | Reverse annealing behaviour and shallow $p^+n$ junction characteristics of $BF_2^+$ implanted silicon |
| **Lu Diantong, Lu Wuxing, Wang Zhonglie, Du Yongchang, Zheng Huaide, Mo Dang and Liang Zhongning** | 219 | Properties of SOI structures formed by high dose oxygen implantation into silicon |
| **Lu Wuxing, Qian Yahong, Lu Diantong and Wang Zhonglie** | 223 | The annealing of MeV energy boron ions implanted into silicon |
| **Yang Lijia, Liu Yili, Wang Zhonglie and Li Hengde** | 227 | Ion-beam induced orientation growth of PtSi |

| | | |
|---|---|---|
| **Ye Min, Lin Huiwang, Fei Guifu, Tsien Peihsin, Zhang Jingping and Yin Shiduan** | **231** | Formation of $TiSi_2$ and shallow junction by $As^+$ ion beam mixing and infrared rapid heat treatment |
| **Zhang Tonghe, Li Guohui, Wu Yuguang and Luo Yan** | **235** | Influence of As-flux on As enhanced diffusion and residual defects |
| **Cai Guangjun, Jin Zhuqing and Chen Yuanru** | **239** | The microstructure of $N^+$ implanted steels |
| **Ding Xunliang, Wang Zhonglie and Qian Yahong** | **243** | The structural and electrical properties of ion-beam mixed tungsten silicides |
| **A Dunlop, D Lesueur, G Jaskierowicz and J Schildknecht** | **247** | Stability of displacement cascade damage in iron under high energy self ion bombardment |
| **Xiangjun Fan, Huaixi Guo, Shuqi Wang, Quanhua Yu and Chengming Tian** | **251** | Electrical properties of Al–Mn amorphous films formed by ion beam mixing |
| **Feng Yucai, You Dawei, Li Wenzhi and Wang Yuntao** | **255** | The dependencies of the dynamic recoil mixing zone on beam energy of irradiation, dose, dose rate and temperature of sample |
| **Gao Wenyu, Li Hongcheng, Wang Ruilan and Liu Jiarui** | **259** | The effect of temperature on ion beam mixing of Mo films on Si substrates |
| **Li Yi, Ye Weiyi, Wang Wenjing and Lu Gonyuan** | **263** | The mechanical and corrosion behaviour of iron implanted with $N^+$ |
| **Li Yupu, Wang Peixuan, Zhang Guoguang, Ma Ruzhang, Liu Jiarui, Zhu Peiruan and Yang Feng** | **267** | Influence of temperature on He-implanted stainless steel |
| **Liu Shang-he, Liu Zhi-cheng, Zhai Bing-xun and Wang Zhong-lie** | **271** | Modification of polyvinyl chloride surface electrostatic properties by an ion beam |
| **Liu Yu-Qiu, Meng Xian-Ren, Ren Yan-Ru, Lin Ming-Zhu, Cui Peng and Tu Qing-Yun** | **273** | Superconductivity in Mo films after implanting Be ions |
| **Lü Jian-Qiang, Wang Zhong-Lie, Ding Xun-Liang, Hu Ren-Yuan and Cui Fu-Zhai** | **275** | A study of the chemical driving force in ion mixing of metal–metal systems |
| **Luo Guiyun, Zhang Guoliang, Kou Shiming and Wang Sixiang** | **279** | Improvement of the fatigue lifetime of steel implanted with N after heat treatment |
| **M Nunogaki, H Suezawa, Y Kuratomi and K Miyazaki** | **281** | Effects of ion implantation on nitriding metal by the plasma source nitriding |
| **Guo-qiang Pang, Hang-he Zhang, Zheng Yu, Lie Dou, Jin-cai Hu and Guang-hou Wang** | **285** | Hydrogen implantation of the high $T_c$ superconductor $YBa_2Cu_3O_7$ |
| **Shang Wei, Jiang Xin-yuan and Feng Xi-qi** | **287** | Annealing of ion induced damage and alteration of composition in the near-surface of ion-implanted $LiNbO_3$ |
| **Wang Peilu, Liu Zhongyang and Jiang Jingyun** | **289** | Anodic polarization study of the effect of double ion beam mixing on Duralumin corrosion behavior |
| **Yi-hua Wang and Zheng-qiong Hu** | **293** | The modification of the mechanical properties of soft metals by ion implantation |
| **M H Xu, S Patu and Z G Wang** | **297** | The modification in fatigue life of pure polycrystalline nickel by carbon ion implantation |
| **Xu Shiru, Zhang Ying and Zheng Tianpi** | **301** | Improving electric contacts by ion implantation |
| **Zhao Jie and D A Thompson** | **303** | Ion beam mixing for ohmic contact formation to n-type GaAs |
| **X Zhou, H K Dong, H D Li and B X Liu** | **307** | Structural correlation in tantalum nitride formation by direct nitrogen implantation |
| **M Hou** | **309** | The computer simulation of ISS |
| **Wang Ke-Ming, Liu Xi-Ju, Wang Yi-Hua, Liu Ji-Tian, Shi Bo-Rong and Chen Huan-Chu** | **315** | Range distribution of heavy ions in multi-elemental targets |

| | | |
|---|---|---|
| **E Veje** | **319** | Ion-induced sputtering as a light source for atomic spectroscopy |
| **Zheng Zhihao, Wang Yongqiang, Xiang Jinzhong, Ma Zhihui and Liao Changgeng** | **323** | Boron profiles in amorphous and crystalline silicon |
| **L B Bridwell, N E B Cowern, P M Read, C J Sofield and N Sanderson** | **325** | The evolution of $\Delta E/\Delta X$ for 7 MeV/u $^{16}O$ ions in carbon |
| **B Emmoth and H Bergsaker** | **329** | Sticking studies of atoms to different surfaces at the Van de Graaff laboratory, AFI-Stockholm |
| **Jiang Binyao and Dai Renzi** | **331** | Distribution of deposited energy by low energy ion implantation in compound materials |
| **M Kitagawa** | **335** | Stopping power at the solid surface |
| **Wen-Zhi Li** | **339** | A Monte Carlo simulation of range and damage distributions for energetic ions in amorphous solids |
| **Zhengying Pan and Peng Zhou** | **343** | A Monte Carlo simulation of the effect of the surface oxide layer on blocking dips |
| **Xia Yueyuan, Tan Chunyu, Yang Hong, Sun Xiufang, Liu Jiarui, Zheng Zongshuang and Zhu Peiran** | **347** | Electronic stopping powers derived from range measurements for ions at low velocity |
| **Bo-xu Zhang and Xian-can Deng** | **351** | IMSOP—a program for the simulation and optimization of ion implantation |
| **Zheng Li-Ping and Cui Fu-Zhai** | **353** | A Monte Carlo simulation of angular distribution in low energy sputtering |
| **D S Gemmell, A Faibis, E P Kanter, Z Vager and B J Zabransky** | **355** | Physics with fast molecular ions |
| **F Fujimoto** | **361** | Coating film formation by dynamic mixing method |
| **W Heiland** | **367** | Low energy ion beam scattering for surface analysis |
| **T Sønderskov** | **373** | Performance of a new high current implanter for ion hardening |
| **H Winter** | **375** | Atomic spectroscopy and polarized beams at small accelerators using grazing ion–surface scattering |
| **R Koudijs** | **381** | Megavolt system for ion implantation and analysis |
| **H A P van Oosterhout** | **385** | Review of 400 kV and 500 kV systems for ion implantation and analysis |
| **Cai Xiaohong, Liu Jihu, Liu Zhaoyuan, Ma Shuxun and Dong Fayun** | **393** | $L$-shell ionization of Eu, Gd, Dy and Ho by 2.25–4.50 MeV incident $Li^{2+}$ ions |
| **P Håkansson and B U R Sundqvist** | **397** | Electronic sputtering of biomolecules and its application in mass spectrometry |
| **I Kohno** | **401** | Application of RIKEN 160 cm cyclotron |
| **Zuwu Lai, Renhe Liu, Jiming Wang and Baifu Xie** | **405** | The enhanced adhesion properties of metallic thin films on metal substrates by ion implantation |
| **Lei Zi-ming, Liu Jia-rui and Pan Guang-yan** | **409** | Absolute emission cross sections in collisions between $Ar^+$ and He, Ne |
| **W N Lennard** | **413** | Beam identification system for a 2 MV mass separator |
| **Liu Jia-rui, Lei Zi-ming, Yang Feng, Pan Guang-yan, Yu De-hong and Sun Shiang** | **417** | Singly and doubly charged ion collisions with neutrals into excited states |
| **Liu Zhaoyuan, Ma Shuxun, Dong Fayun, Liu Shaoxiang, Liu Jihu, Cai Xiaohong, Zhang Zhijin and Feng Jiazhen** | **421** | Proton and alpha particle induced $L$-shell ionization of rare earth and heavy elements |
| **Pan Xian-zheng and Pan Feng** | **425** | Formation of Ag/Si and Al/Si films by ion assisted deposition |
| **E Veje** | **429** | Accelerator-based chemiluminescence from steady-state gas–surface reactions |

| | | |
|---|---|---|
| **Guang-hou Wang, Lie Dou, Ling Chen, Guo-giang Pang, Hai Sang, Min-kang Teng, De-xun Shen, Xiang-jin Li, Ke-ming Wang, Yi-hua Wang and Jin-tian Liu** | **431** | Structural change in iron implanted potassium bromide crystals |

ABSTRACTS

| | | |
|---|---|---|
| **Li Weizhong, Zhang Jisheng, Lin Yufeng, Wang Yong, Yang Jingming, Luo Yiheng and Li Zhijian** | **433** | SOI structure by $N_2^+$ implantation into silicon |
| **Yang Xizhen, Ka Weibo, Ren Weihong, Wang Shirun and Fan Xiwu** | **433** | Influence of $Se^+$ and $S^+$ implantation on deep levels in ZnSe |

Selected Proceedings of the
1st IBERIAN MEETING ON VACUUM AND ITS APPLICATIONS
28 September–1 October 1988, Braga, Portugal

| AUTHORS | | ARTICLES |
|---|---|---|
| **J L de Segovia and M Pereira dos Santos** | 609 | Foreword |
| **R L Kurtz, S W Robey, R L Stockbauer, D Mueller, A Shih, L Toth, A K Singh and M Osofsky** | 611 | Electronic structure of high-$T_c$ superconductors studied using photoelectron spectroscopy |
| **N G Dhere** | 617 | Evolution of high $T_c$ superconductors and their thin films |
| **D P Woodruff** | 621 | Local scattering probes of surface structure |
| **A P de Lima** | 627 | Low energy positrons for near surface studies |
| **E M Williams and J L de Segovia** | 633 | Electron stimulated desorption of ions from surfaces: techniques, methodology and some recent findings with water at metals and semiconductors |
| **J M Lopez Sancho** | 643 | Correlation effects in spectroscopies from adsorbates |
| **M Andritschky** | 649 | Damage of oxide layers on an Al-alloy by electron bombardment |
| **C A Bernardo** | 653 | Application of controlled atmosphere electron microscopy to the study of catalyst deactivation and regeneration |

| | | |
|---|---|---|
| F J Bustillo, E Román and J L de Segovia | 659 | Adsorption and thermal desorption of $H_2O$ on $TiO_2(001)$ at 250 K |
| A Ballester, M L Blázquez, F González, E Román and F J Bustillo | 663 | Studies of zinc sulphide, treated with different solutions of catalyst ions |
| S Rey, I Colera and J L de Segovia | 665 | Thermal desorption and surface and layer characterization of $H_2O$ adsorbed on Nb(110) at 240 K by TDS, ESD and ELS |
| J Soria, J C Conesa, R Mariscal, M Castro and V M Villalba | 669 | Influence of phosphorus addition on the properties of V–Mo–$TiO_2$ catalysts |
| R Alvarez, J J Lorenzana, M R Martínez-Tarazona, J A Pajares, A J Pérez, J J Pis and J M Palacios | 673 | The influence of preheating of coals in the textural properties of the resulting cokes |
| A B Fuertes, J J Pis, A J Pérez, J J Lorenzana, J A Pajares and J M Palacios | 677 | Variation of the textural properties of a coke during gasification |
| J M Villalvilla, C Santos and J A Vallés-Abarca | 683 | Significance of charge exchange in the determination of yields in broad-beam ion etching |
| J Montserrat, J Bausells, E Lora-Tamayo and F Serra-Mestres | 687 | Fabrication of CMOS retrograde wells by doping compensation with ion implantation |
| O M N D Teodoro, A C Godinho, M H Vasconcelos, A M C Moutinho and M L Costa | 691 | A preliminary study on identification of oil components by SIMS |
| J A Peinador, I Abril, J J Jiménez-Rodríguez and A Gras-Martí | 695 | Atomic mixing of multi-component materials: the dilute limit |
| A M C Pérez-Martín and J J Jiménez-Rodríguez | 701 | Escape probability of the outermost sputtered atoms |
| J S Colligon and H Kheyrandish | 705 | Radiation enhanced adhesion of thin films |
| J Verhoeven, E Puik and M J van der Wiel | 711 | Formation and characterization of multilayer coatings for X-ray optics |
| J B Almeida | 717 | Design of magnetrons for dc sputtering |
| I Esquivias, M Recio, T Rodriguez and J Sanz-Maudes | 723 | Structural properties of electron beam evaporated zinc sulphide thin films |
| O Sanchez, C Gomez-Aleixandre, M Fernandez and J M Albella | 727 | Influence on the electrical characteristics of the –NH radicals incorporated into PECVD silicon nitride films |
| M M D Ramos, J A Ferreira, M I C Ferreira and M P dos Santos | 731 | Application of the photoacoustic technique to the determination of the thickness of multilayer films produced by magnetron sputtering |
| M M D Ramos, J B Almeida, M I C Ferreira, M P dos Santos, M D R Cruz and A L Santos Gama | 735 | Molybdenum coatings produced by magnetron sputtering |
| H Carbajal and E Dominguez | 739 | Boosting of reflectivity of metallic deposits for X-radiation subjected to high densities of electric current |
| N G Dhere | 743 | Present status of the development of thin-film solar cells |
| J M Martínez-Duart and J M Albella | 749 | Metallization technologies for ULSI |
| E Cabruja, C Cané, M Lozano, C Domínguez, F Serra-Mestres and E Lora-Tamayo | 757 | Positive photoresist stripping by plasma barrel |
| J Fernández, F Berta, S Hidalgo, J Paredes, J Rebollo, J Millán and F Serra-Mestres | 761 | Optimization of the epitaxial layer properties for low voltage capability VDMOS devices |
| J Suñé, I Placencia, E Farrés, N Barniol and X Aymerich | 765 | Breakdown of $SiO_2$ films in VLSI MOS structures |
| I Placencia, J Suñé, E Farrés, N Barniol and X Aymerich | 771 | On the oxide interface micro-roughness in MOS devices |

| | | |
|---|---|---|
| **A Ferreiro, J du Port de Pontcharra, C Jaussaud and E Lora-Tamayo** | **775** | Analysis of $GeH_4$ and $GeF_4$ as gaseous feed materials for germanium implantation |
| **M Clement, J M Sanz, A Climent and J M Martínez-Duart** | **781** | An AES and RBS characterization of tantalum silicide layers on GaAs: sputtering and annealing effects |
| **A Canillas, E Bertran, J L Andújar and J L Morenza** | **785** | *In situ* optical characterizations for rf plasma deposited a-Si:H thin films |
| **L Guimarães, R Martins, M Santos, A Maçarico, N Carvalho, E Fortunato and M Vieira** | **789** | Hydrogenated thin film silicon semiconductors produced by a two consecutive decomposition and deposition chamber system |
| **M Lavado, R Martins, I Ferreira, G Lavareda, E Fortunato, M Vieira and L Guimarães** | **791** | Electron paramagnetic resonance of defects in doped microcrystalline silicon |
| **J L Andújar, E Bertran, A Canillas, J Esteve, J Andreu and J L Morenza** | **795** | Real time controlled rf reactor for deposition of a-Si:H thin films |
| **A Calcatelli** | **799** | Vacuum measurements and gauge calibration |
| **R F M Lobo and A M C Moutinho** | **809** | Multicapillary swivel-type McLeod |
| **N Pinhão, F G Carvalho and J Ferreira** | **811** | Quantitative measurement of partial pressures in halogen-quenched Geiger–Müller counters |
| **P V Head** | **815** | Crossflon 905 is a new bearing material for manipulators used in vacuum |
| **M Á Cunha, J M A Frazão, J M C Lourenço, M F Laranjeira and A M C Moutinho** | **819** | $CO_2$ and $CS_2$ cluster concentrations in a supersonic molecular beam |
| **F Waelbroeck** | **821** | Thin films of low *Z* materials in fusion devices |
| **J G M Römer, Z Sanok, D Trines and A Wyszogrodzki** | **835** | Dynamic *in situ* bakeout for the HERA proton ring vacuum system |
| **G Gervasini and F Reiter** | **839** | Tritium recycling, permeation and inventory in a self-cooled fusion reactor blanket using Pb–17Li or Flibe as a breeder and V or Fe as a first wall material |
| **R Barral, F Guimaraes, J Almeida and M I Ferraira** | **843** | Construction and characterization of a thin film vacuum coating system |
| **J I Lombraña, F Varona and F Mijangos** | **847** | Heat supply enhancement in the freeze-drying of pharmaceuticals: effects of the frozen solution disposition inside the phial |
| **J I Lombraña and C Urrutia** | **851** | Porous matrix properties of freeze dried products as induced by their thermal history during freezing |

## numbers 11/12

Low Energy Ion Beams—5. Selected Proceedings of the Fifth International Conference, 3–6 April 1989, University of Surrey, Guildford, UK

| AUTHORS | | ARTICLES |
|---|---|---|
| **I H Wilson** | **1023** | Preface |
| **D Aitken** | **1025** | The development of ion implanter technology |
| **J G Bannenberg, W H Urbanus, R G C Wojke, H Klein, A Schempp, R W Thomae, T Weis and P W van Amersfoort** | **1031** | Matching, transport and bunching of four 40-keV ion beams with an electrostatic quadrupole channel |
| **E Surrey, A J T Holmes, M Thornton and K Astley** | **1035** | Beam transport in a single gap accelerator |
| **P M Walker, A Bhagwat, B D D Singleton, J Rikovska, N J Stone and I S Grant** | **1039** | Daresbury isotope separator and nuclear orientation facility |
| **P Spädtke and D Ivens** | **1043** | The use of micro-computers in the simulation of ion beam optics |
| **C Jeynes** | **1047** | Novel applications of ion implantation |

| | | |
|---|---|---|
| **K Srikanth and S Ashok** | **1057** | Study of low-energy hydrogen implantation in silicon |
| **A C T Tang, B J Sealy and A A Rezazadeh** | **1061** | Enhanced electrical activation of Zn and Be implants in GaAs by the co-implantation of phosphorus |
| **S P Withrow, K L More, R A Zuhr and T E Haynes** | **1065** | Ion beam deposition of $\beta$-SiC layers onto $\alpha$-SiC substrates |
| **I V Katardjiev, G Carter and M J Nobes** | **1069** | A fundamental approach to surface evolution during growth and erosion |
| **M Grasserbauer and G Stingeder** | **1077** | Secondary ion mass spectrometry (SIMS) of silicon |
| **R Wilson, J A Van den Berg and J C Vickerman** | **1089** | Surface analysis using electron beam SNMS, applications and investigations of sputter yields |
| **H H Andersen** | **1095** | Formation and stability of sputtered clusters |
| **S S Todorov and I R Chakarov** | **1101** | On the mechanism of sputtering of $SiO_2$ by Ar at ion energies near the sputtering threshold |
| **G K Wolf** | **1105** | Modification of chemical properties by ion beam mixing techniques |
| **J Ishikawa, K Matsugatani and G Takaoka** | **1111** | Low temperature formation of silicon nitride and oxide films by the simultaneous use of a microwave ion source and an ICB source |
| **A F Calder, D J Bacon, W J Phythian and C A English** | **1115** | Collapse of cascades produced by low-energy ion irradiation of gold |
| **Z H Jafri, C Jeynes, R P Webb and I H Wilson** | **1119** | Observation of swelling and sputtering of a silicon target under argon ion irradiation using a double marker technique |
| **I R Chakarov, D S Karpuzov and S S Todorov** | **1123** | Computer simulation of ion-bombardment induced sputtering of Rh(111) surface |
| **J Ishikawa, H Tsuji and T Maekawa** | **1127** | Electron detachment cross-sections in low energy heavy negative ion beam apparatus |
| **A El Khalki, F Proix and C A Sébenne** | **1131** | Room temperature interaction of ionised nitrogen with cleaved GaAs |
| **H Mantle, A Pflugi, P Oelhafen and U Feller** | **1135** | Contamination problems with broad beam ion sources when producing Nb–$Nb_2O_5$–Pb alloy Josephson junctions |
| **D H Yellen, D J Bacon, W J Phythian and C A English** | **1141** | Characterization of damage caused by heavy-ion irradiation of alpha-titanium |
| **E Surrey and G Proudfoot** | **1145** | Characterisation of a small negative ion source |
| **N J Whitehead, R M Gwilliam, W P Gillin and B J Sealy** | **1149** | The use of Hall effect profiling to monitor the reactivation of silicon implants after oxygen implantation in gallium arsenide |
| **R G Forbes and N N Ljepojevic** | **1153** | Modelling of liquid-metal ion sources |
| **M Rahmani and P D Townsend** | **1157** | $Ag^+$ implantation in $Al_2O_3$, $LiNbO_3$ and quartz |
| **R P Webb and I H Wilson** | **1163** | Problems using the Sigmund formula for the calculation of sputtering yields |
| **R A Yankov, I H Wilson and I R Chakarov** | **1167** | Implanted oxide layers in silicon—establishment of a critical dose for direct formation of a stoichiometric buried $SiO_2$ layer |
| **T I Cox, V G I Deshmukh and D G Armour** | **1171** | Reactive ion beam etching studies of tungsten with $CF_4$/argon mixtures using ion scattering spectroscopy and SIMS |
| **H R Kaufman and R S Robinson** | **1175** | Broad-beam ion source technology and applications |
| **F Heinrich, H-P Stoll, H-C Scheer and P Hoffmann** | **1181** | Optical emission spectroscopy for analysis of broad ion beams |
| **D Korzec, J Engemann and R Wolters** | **1185** | Control of plasma parameters in a cylinder symmetrical capacitively coupled rf ion source by use of a magnetic field |
| **D M Rück, H Emig, P Spädtke, B H Wolf, I G Brown and B Torp** | **1191** | High current metallic ion beams |

| | | |
|---|---|---|
| **C S Chang, T L Porter and I S T Tsong** | **1195** | Impact collision ion scattering spectrometry studies of thin metal overlayers on Si(111) surfaces |
| **N S Xu and J L Sullivan** | **1201** | A comparison of helium ion and fast atom scattering from copper surfaces |

| | |
